

Salt System Instructions

Initial Start Up

- ❖ 7ft Spas – Pour in 4L (2 Jugs) Genesis Tru-Blu (liquid)
- ❖ 8ft Spas – Pour in 5L (2.5 Jugs) Genesis Tru-Blu (liquid)

Ideal Range is 7 – 7.6 or 1750ppm

If above 8, the Genesis system will shut down due to the high level of salt.
After first use of tub, add 2 capfuls of Spa Perfect (Aids in waterline control)

Weekly Maintenance

- ❖ Test Bromine level. Maintain between 2.5 & 3.5 ppm.
 - ❖ Adjust filtration cycle to regulate Bromine output.
- ❖ Maintain PH reading between 7.2 & 8.0 Use Adjust Up or Down if adjustments are required. Use one cap to per color block on test tube.
- ❖ After heavy use, add 2 capfuls of Refresh. Use 1 capful of Refresh per week.
 - ❖ Add 1 capful of Spa Perfect per week

Periodic Maintenance

- ❖ Use Easy Clear if water becomes cloudy.
- ❖ **USING EASY CLEAR WITH A DISPOSABLE FILTER WILL CLOG IT, ONLY USE EASY CLEAR JUST BEFORE CHANGING YOUR FILTER**
- ❖ When topping up spa water, always take a salt reading before adding more salt
- ❖ Spa should be drained, cleaned and refilled at least 2 times a year. May need to be changed more frequently with heavy use.

LEAVE COVER OPEN FOR 25 MIN. AFTER ADDING REFRESH. GIVE EACH PRODUCT 12 HOURS TO WORK BEFORE ADDING ANOTHER PRODUCT
